THE HANDMADE EASTMAN ARCHTOP

Premium tonewoods and meticulous craftsmanship form a harmonious relationship

that made Eastman’s name in the jazz guitar world. The choice of tonewoods and the time honored processes followed to craft these guitars create an organically acoustic tone that is seldom matched. Chords are full and complex while single notes are crisp and well defined. Custom Kent Armstrong pickups compliment the sound of the wood and deliver a smooth and balanced tone. The hardware and fittings provide form and function and the traditional lacquer finish is as beautiful as it is functional.

♦ **JIM FISCH ARCHTOP GUITARS**

This special series commemorates the late jazz guitar aficionado; Jim Fisch. Before his unfortunate passing he made his impression on the Uptown guitar series by using mahogany for the back and sides and rosewood for the fretboard, bridge, & tailpiece to give it a unique voice as well as “dressing it down” for a modest appearance. The result is an archtop with superior midrange, volume, and a very woody vintage tone. Deluxe hardshell case included.

Available finishes: Classic • Classic/Sunburst (burst top/classic back & sides)
